

**AMENDMENTS TO THE SPECIFICATION**

**Page 8, please further amend the fourth full paragraph as follows:**

As shown in Figs. 1-3, a spiral belt 26 being a monospiral belt formed by spirally winding a cord along the circumferential direction of the crown portion 18 is embedded in the rubber material forming the crown portion 18 at the outer circumferential side of the carcass 12, and a pair of cross belt members 28A, 28B extending in parallel to each other in a common curved plane are arranged on the outer circumferential side of the spiral belt 26 at both sides of the equatorial plane CL of the tire, respectively.
